

PROVIDES THE HOLDING POWER OF A TOGGLE BOLT

The toggle action supplies extra holding power in drywall, while its self-drilling tip eliminates all the extra hassles and messes of installing a regular toggle anchor. The DrillerToggle's fine centered point helps guide the anchor into the wall with a flawless precision. Its sharp cutting edge reduces the force required to cut the material and its powerful toggling mechanism holds tightly behind the drywall. Available sizes range from 1/8", 3/16" & 1/4" (4 mm, 5 mm, 6 mm)
