

## THE ONLY EXPANDABLE SCREW-IN ANCHOR ON THE MARKET

It expands and grips behind the drywall and it is twice as strong as a regular screw-in anchor. Its patented design offers the ultimate holding power without any pre-drilling. Its unique body design consists of four expandable wings that collapse and grip tightly behind the drywall.

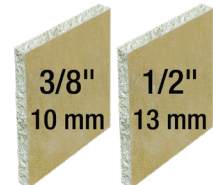

A fine centered point helps guide the anchor into the wall with flawless precision. A sharp cutting edge reduces the force required to cut the material. Also, a sharp profile thread cuts deeply into the hole to ensure ultimate holding power and stability without damaging the wall material.

### VIDEO

### MOUNTING SURFACE

- Self-drilling anchor. No pre-drilling required
- Quick and easy to install
- All you need is a screwdriver
- Recommended for ceiling application

### INSTALLATION PROCESS

1. Using a screwdriver, push the tip of the WallGripper® into the drywall in a screwing motion.
2. Turn clockwise until flush with surface and firmly in place.  
(Do not overtorque)
3. Insert the screw through the object you need to affix and turn clockwise until firmly in place.
